

Damage to play equipment at Windmill Park

Unfortunately the seat on the Zipline in the play area of Windmill Park has needed to be removed as a result of damage.

Evidence would suggest that the damage is caused by dog owners allowing their pets to play with the seat resulting in the edges being chewed away. This is not the first time the seat has had to be replaced.

The result is a cost to the Parish Council and inconvenience to the children who would otherwise enjoy using the Zipline.

The seat will be replaced but we would encourage all users of the play equipment to treat it with care so that it is there for all to enjoy.

As a reminder ó the playing field is out of bounds to all dogs as a precaution against, not only the unpleasantness of finding dog mess on shoes or clothes but as protection from possible infection from dog mess.

Children especially are vulnerable to Toxocariasis, an illness transmitted in dog mess from dogs suffering from the parasite. Thankfully, this illness is quite rare but in extreme case can cause child blindness.

Please keep dogs out of the playing field.
